

Surgi-Gel™ PLUS Sterile

Indications

Surgi-gel PLUS™ Lubricating gel is recommended for specific surgical and gynaecological lubrication when increased adherence is needed.

Contains: Purified water, glycerol, carbomer 940, propyl hydroxybenzoate and methyl hydroxybenzoate.

Directions for use

Apply as required.

Features and benefits

- Water soluble lubricant.
- Latex free.
- Sterile gel.
- Chlorhexidine free.
- Greaseless.
- Transparent.
- Non-staining.

Precautions

- Do not use if known hypersensitivity to hydroxybenzoates.
- Surgi-gel PLUS™ Lubricating Gel is not a contraceptive.
- Surgi-gel PLUS™ is normally well tolerated, but should skin irritation occur, discontinue use.
- Sensitisation has occurred when medications containing hydroxybenzoates have been applied to damaged or broken skin.
- After topical use, local irritation may occur. Hypersensitivity reactions have been reported.
- Store in a cool dry place out of direct sunlight.
- Single use only.
